The basic FIBER-REX 1U modular patch panel system has unloaded panels without LGX adapter plates or MTP. The panel can also be pre-loaded with any 3 combinations of LGX adapter plates or MTP cassettes of your choice, or pre-loaded with pigtails to meet your project needs. An optional fiber management kit can also be included.

The tray is locked in place by two plastic latches, and when fully extended the tray is designed to lower to 45°. This provides the perfect working platform for simple installation or easy maintenance and access, even after the panel is installed in the rack.

With only 1 1U modular patch panel, capable of facilitating all configurations of LGX adapter plates or MTP cassettes, you can cost effectively reduce your stock and order accessories on demand based on your customer projects.

⭐ Features

- Recessed panel mounting option
- Accept any 3 combinations of LGX adapter plates or MTP cassettes
